

water borne diseases. It also lowers the pupils performance more especially in grades during PLE results . And not only that but also the pupils physical body development is affected.

4. The beneficiaries of this borehole are particularly about 100 house holds around the school, 200 pupils at school and 150 orphans. I pray that once our school gets this bore hole the life of the children orphans, widowers and the community at large will benefit a lot. Their life will change due to the safe water source .
5. Dear father the school promises to take care of this borehole incase it breaks down together with the school management committee .It will also have a set up committee members responsible for the borehole.
6. Through general parents meeting together with the committee responsible for the borehole will raise funds for its maintainace.
7. Lastly but not least attached are the photos of the current water sauce and the planned construction site.

We shall be very grateful if our application meets your parental consideration.

May God reward you abundantly as you plan for this wonderful gift to our school.

I remain yours faithfully
